Letter of Support for Eureka Main Street/ 3D Project

Travel Nevada,

I am writing this letter in support for the Eureka Main Street Program applying for the 3D project. I believe a partnership between Eureka County, the local businesses, and the Main Street Program is vital for destination development and tourism in our county.

I work for the Eureka County Sheriff's Office and I am a local business owner. As a Lieutenant for the Sheriff's Office, I have spoken with many business owners and listened to their success and trials of owning a business within the township of Eureka. My wife and I own an antique store that is in a historic building. At times there have been challenges in the upkeep of the building, curtilage around the building and preserving the historic building we occupy.

Eureka is along historic US 50. I believe our town could be a major stop due to its many beautiful historic buildings. Our town needs help with new signage, infrastructure, marketing and tourism. I believe this project would help in bringing much needed partnerships, education and growth opportunities. I believe that with the 3D project, cooperation between Main Street Program and Eureka County/Local Businesses that we would be able to achieve those goals of growing and sharing the unique and historical Township of Eureka.
